## **Commencement of Collaboration on Company Support Looking Toward Creation of Decarbonized Society**

**Tokyo, November 26, 2021** --- MUFG's consolidated subsidiaries Mitsubishi UFJ Trust and Banking Corporation ("the Trust Bank") and Hitachi, Ltd. ("Hitachi") have commenced a collaboration ("the Collaboration") on company support, looking toward the creation of a decarbonized society. Starting from this month, we will provide services utilizing the array of environment-related solutions that Hitachi possesses to the companies that are customers of the Trust Bank. Please note that this is based on the Ordinance for Enforcement of the Banking Act that was revised on November 22, 2021.

Demand that companies disclose information about their activities addressing climate change has been increasing. In Japan, in response to the revision of the Corporate Governance Code in June 2021, some listed companies will begin to disclose information regarding sustainability such as the impact of global warming on management and their environmental measures from April 2022, which is drawing the attention of various stakeholders.

Through the Collaboration, the Trust Bank and Hitachi will thoroughly and comprehensively support companies' planning, implementation and management of decarbonization measures as well as their disclosure of information and their engagement and provision of solutions that contribute to the improvement of the activities and value of the corporations. More specifically, Hitachi will implement a series of measures ranging from the collection of an array of environment data to the calculation and improvement of emission volumes, and the Trust Bank will support companies in their response to the requests for engagement and the disclosure of information from stockholders and other stakeholders.

In the future, engagement support together with the efforts of institutional investors, etc. utilizing the Trust Bank's SR/IR<sup>\*1</sup> expertise combined with Hitachi's Lumada<sup>\*2</sup> technology and expertise in environment-related calculations and reporting, we will jointly consider the expansion of effective disclosure, etc. and support the sustainability measures of Japanese companies.

To support the companies to improve their corporate value, we will continue to work to create new services and new added value, and also continue to openly examine the future with a view toward cooperation and collaboration with a wide range of stakeholders including investors, operators and financial institutions, based on the ESG management trend being promoted by companies.

\*1 Shareholder Relations/Investor Relations

\*2 Lumada is the name of Hitachi's advanced digital solutions and services for turning data into insights that drive digital transformation of social infrastructure.
